

I should have the choice to purchase and listen to any broadcast that I want. If a new enterprise comes along and offers better and more competitive resources for news, weather and traffic, they should not be closed down by the Liberal American Media!

We should have the right to choose. That is what our country was founded on. The liberal Government says that my daughter can choose without my consent - but I can't choose what sources of news and traffic. What is up with That!

Thank You,

David Green
